

EVENTS *reimagined*

Hybrid Event Solutions
Connecting People

OVERVIEW

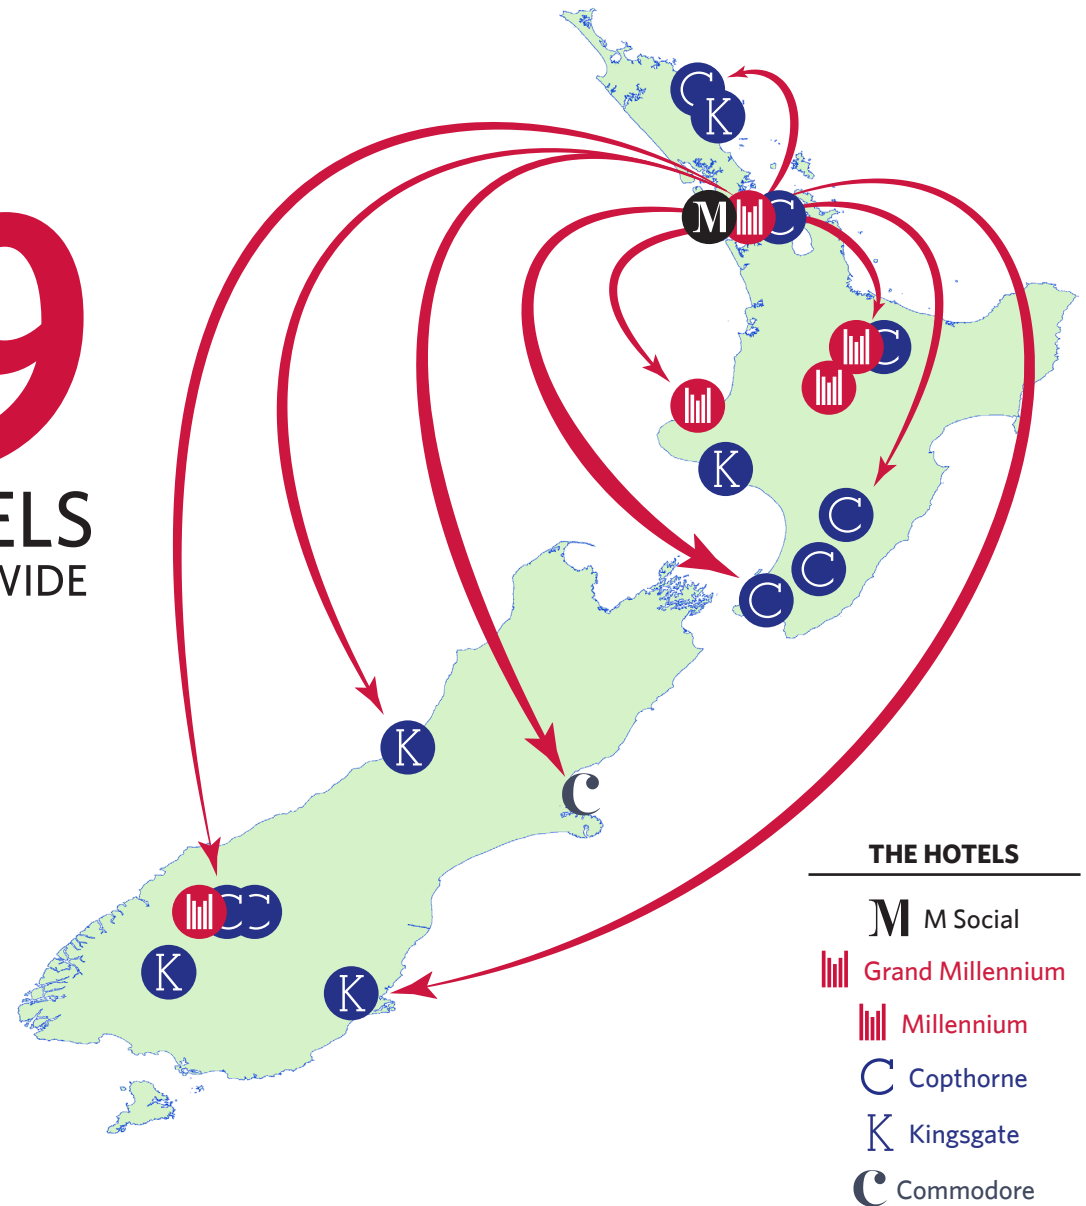

Extraordinary Times require Extraordinary Solutions

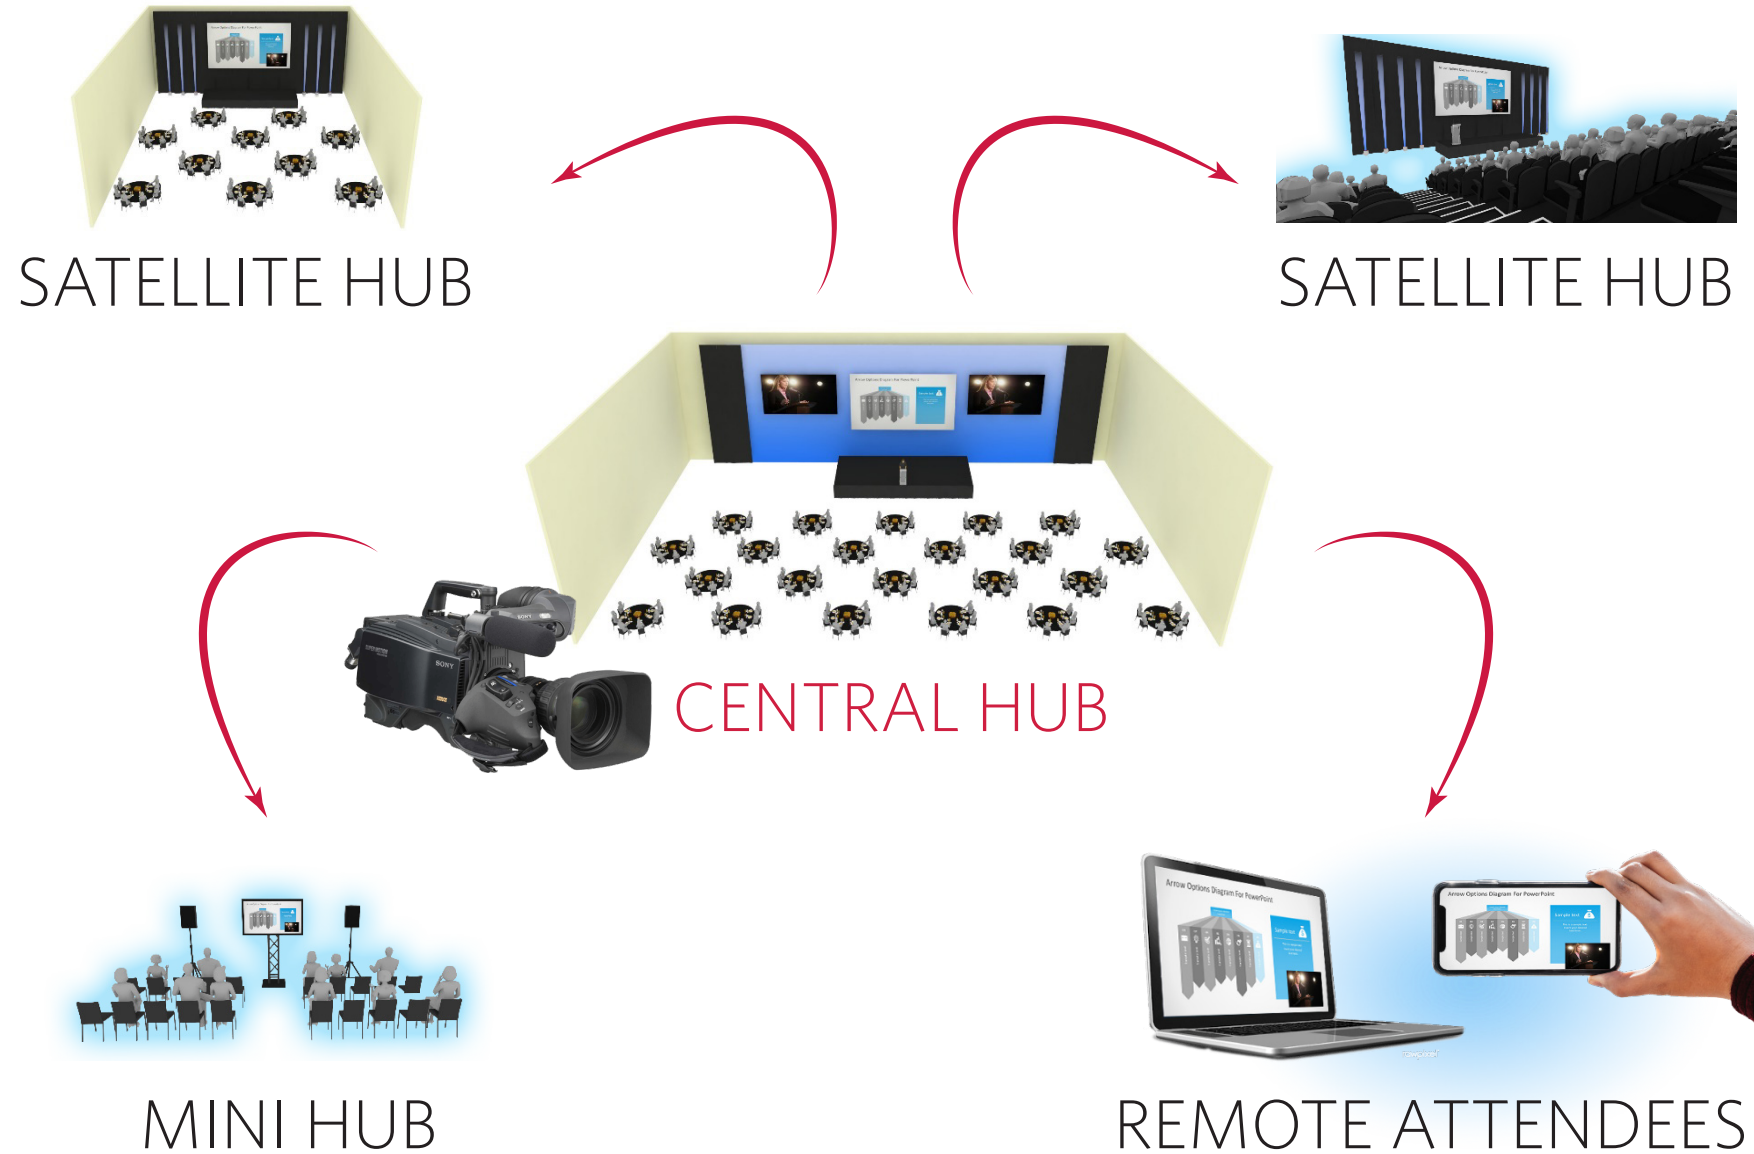

Current technologies allow for multi-site video and content streaming from almost any location, enabling traditional events to evolve to new and exciting formats, delivering engaging experiences for those who attend.

Events Reimagined offers new opportunities for delegates to still connect and meet together.

Together with Multi-Media Systems Ltd and Commodore Hotel, we can provide nationwide audio visual and production services and venues for multiple sites simultaneously. A robust streaming platform allows delegates, presenters and guest speakers to engage from a designated event hub, their business or remotely from anywhere in the world.

HOTELS
NATIONWIDE

CENTRAL HUB

Anchoring the event, the Central Hub sets the scene for the wider audience.

An operated mix of camera feeds and content is streamed live to remote sites, allowing members to connect wherever they are located.

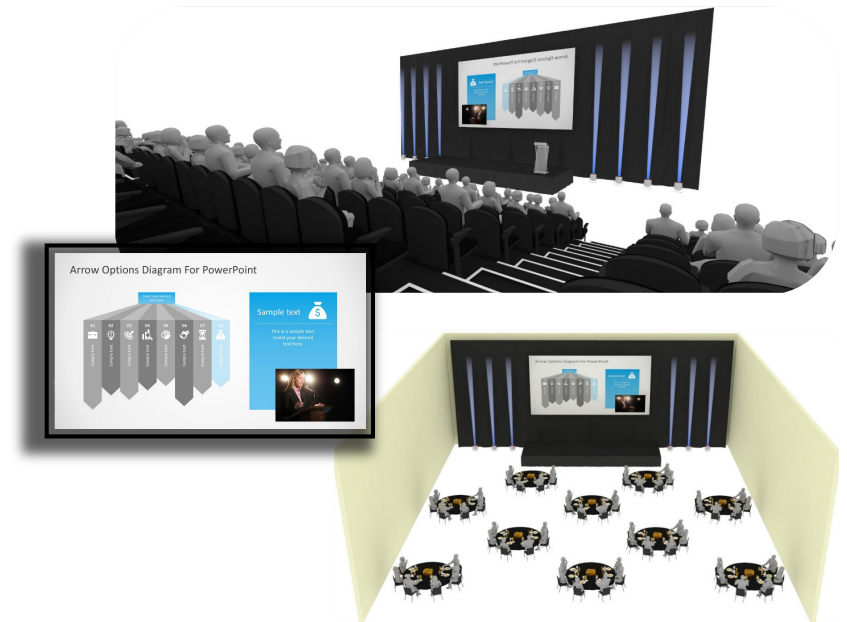

Local audiences are engaged by a dynamic mix of content and live video from the main and remote sites.

SATELLITE HUB

Attendees across Satellite Hub venues follow the same live feed as the Central Hub. A blend of video and content from Satellite Hubs are streamed back to the Central Hub in real time, allowing remote presenters to contribute to the entire conference from multiple sites.

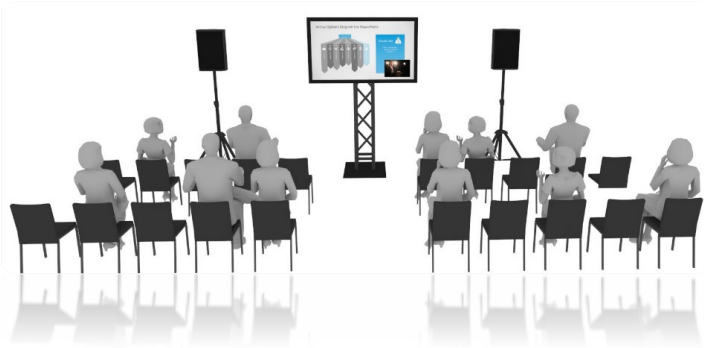

Each Satellite Hub has the option to present autonomously to its local audience if required.

MINI HUB

Attendees unable to travel to the main event can gather at mini hubs. Located at smaller sites these locations utilise inhouse equipment where available or Multi-Media Systems could provide.

Hubs receive a link to the live stream and can be supported by a dedicated AV technician.

REMOTE ACCESS

Attendees who are unable to attend hubs can follow from the comfort of their own home or office.

They can view the live stream on a phone, laptop or tablet, it's as easy as clicking the link. A helpline with dedicated support is available if required.

HUB AV PRICES

Includes: set up and management of a dedicated encrypted high speed connection between hubs, remote access for delegates, guest speakers or live presenters, and a professional live streaming service from the central hub. AV for central hub includes: data projector, single screen or 65" plasma and stand, lectern, sound system with lectern microphone and two lapel microphones, laptop, remote clicker and if required, dedicated video camera and technician.

All options are based on streaming the keynote sessions from any site to remote attendees and satellite hubs.

Option	From
One off Setup Admin Fee	\$250.00
Central Hub <i>(minimum of 35 delegates)</i>	\$45.00 pp
Satellite or Mini Hub
